

## Table of Contents

|  |     |
|--|-----|
| LEGION hardware.....   | 3   |
| Parts .....  | 3   |
| System specific configuration and ordering options .....               | 4   |
| Prerequisites .....  | 4   |
| Probe selection, connector, and pinout .....                           | 5   |
| PC requirements .....  | 5   |
| Absolute maximal ratings and recommended operation conditions .....    | 6   |
| Electrostatic discharge (ESD), EMI, and voltage level precautions..... | 8   |
| ADC connectors and indicators.....                                     | 9   |
| LED indicators.....  | 11  |
| Trigger input notes:.....  | 12  |
| Hardware parameters.....   | 12  |
| Hardware Installation .....  | 14  |
| Standard and custom preamplifier and adapter boards .....              | 15  |
| Signal path and filters for ADC256 / ADC128.....                       | 20  |
| LEGION driver and software setup.....                                  | 20  |
| ADC256 driver installation .....                                       | 20  |
| Setting up software environment: application and SDK installation..... | 23  |
| LEGION software .....  | 23  |
| <i>PhotoSound Data Acquisition Application Window Guide</i> .....      | 24  |
| DAQ Window.....  | 24  |
| Capture Window .....   | 25  |
| MATLAB File Metadata .....   | 26  |
| Trigger Window.....  | 27  |
| ADC Window .....   | 31  |
| Data Window .....  | 33  |
| Status Window .....  | 355 |
| Multiple ADC boards configuration .....                                | 38  |
